Cognizant Technology Solutions
Programmer Analyst

12/2020 - Present   *Pune (Virtual)*

Achievements/Tasks

- Life Science Project dealing with Reminder Services.
- Salesforce configuration & Customization.
- Understanding the client's requirements and analyzing the technical feasibility.
- Interact with customer to get clarification in the requirement if needed.
- Analyze technical requirement and get understanding on the existing system.
- Resolve defects raised by team. (Technical Support)

PERSONAL PROJECTS

Free MCQ-BE (MCQ for Final year Students)

- Developed an web application for Final year SPPU students to provide MCQ under one roof. The main idea behind this project was to crowd source, collect and publish MCQs from different colleges. Students found it helpful, talking about statistics around 30K users and 90K+ hits were recorded using Google Data Analytics.
- **http://freemcqbe.xyz/** (Inactive)

Website for GYM

- Developed and Deployed a website for GYM which includes information about gym, gym trainers, image gallery, map and contact form. The website is live and linked to the gym in google search (google business).
- **http://www.muscularmastiffgym.com/** (Inactive)

House Price Prediction and Analysis

- Developed and Deployed a website for House Price Prediction and Analysis which includes information about Houses and predict prices. Implemented Google Map to show houses and entry form to take new sales entry. Also, Android Application for the same is available on Google Play Store. The website and App are live and working.
